But if you think your life is about breathing you're really missing. So there's a lot of data that something is off. That nurtures your ability to identify problems, and if you closely observe seeing and hearing local optimization. That said, most software developers know all-too-well the pain of new and buggy tools, and can appreciate the motivation behind this principle.

This principle is not so applicable in the context of leading-edge software development. Formal site visits to factories and companies were great, but a lot of the learning and reflection came through discussions with people on the bus and train and there were [...] The post My Embarrassing Sushi Mistake in Japan; Standardized Work, Leadership, and Mental Models appeared first on Lean Blog.
