It was well written and really held my attention to the end. I personally would have preferred to read 8 chapters of politics rather than the "action" that was attached to make a sellable book.

Recalled to active duty after losing his apartment near the World Trade Center. But there came a point where I just couldn't deal with the self-aggrandizing style in the writing, the name dropping, the throw-away lines saying how much braver or more of a leader the author was *Follow the Money* or *Who got the Girl*. And he had enough clout in the military to quickly gather a top-notch group of investigators together to recover the stolen treasures.

Also, it becomes clear in the book that Bogdanos is a short man. I absolutely loved. I've met a number of the Iraqis who worked in the museum and are now in the book - they have no idea who he is.
