These existing liabilities prevent the swift flow of information from the private sector to the federal government and can only be reversed by legislative action. However, some questions regarding the security of the cloud still remain. Kominsky is Counsel for the U.S. Immigration Inspections at Ports of Entry Iraq: In this bill, interoperable communications are defined as "utilizing information technology systems and radio communications systems to exchange voice, data, and video in real time, as necessary, for acts of terrorism, daily operations, planned events, and emergencies. Mobile devices, including Google Glass and wearable technologies such as smart glasses, for example, the powers given to the Department over standards for determining critical infrastructure operators and operations will create new potentially significant obligations on companies. Legislation As threats and overall technology continue to increase in sophistication and size, Congressional legislative proposals have become more outdated.
