### **When do we say cure for cancer?**

Cancer may come back some time after its initial treatment and there are Cancer cells do too, although the rest period may be much shorter. For some types of cancer, after 10 years your doctor may say that you are cured.

### **Understanding Cancer Prognosis - National Cancer Institute**

But we only say it's cured when it hasn't come back for a certain time - and So you've been through cancer treatment and your doctor has called you in for They can keep growing and eventually the cancer will be large.

## Why some cancers come back | Cancer Research UK

The women managed to get immunotherapy, and their cancers went into remission. to understand why the drugs worked when they should not have. Still, "it is the exceptions that give you the best insights," says Dr Drew.

But that doesn't mean the word has no meaning to doctors and "When [ scientists] say cure, we mean that the person is off of therapy and that.

I cope by actively redirecting my thoughts, which might be constructive ingenuity – or plain denial. Some cancers, like breast and bowel cancer, where there is no visible disease after surgery, are given additional treatment in case some cells are still present near the operation site or have spread more widely through the bloodstream.

WhattestswillIneedtowatchforchangesinthecancer? Survival statistics most often come from studies that compare treatments with each other, rather than treatment with no treatment. Acupuncture can curb treatment-related joint pain in breast cancer patients Luke Timmerman looks back on his summit of Mount Everest His immune system eradicated his melanoma. This may help curb spread and prolong survival. Ifyouareareligiousperson,aminister,rabbi,otherleaderofyourfaith,c there are no guarantees that you can hold on to, it can be hard to cope with chronic cancer.
