Wolfgang GrellmannBeate Langer. Taking into account recent trends in this field, the contribution of a large number of specialists from Germany, Austria, Poland and Czechia collected in one volume can be very useful for further developments and information, thus stimulating the theoretical activity in different branches of mechanics, and especially in fracture and damage analysis, in plasticity, viscoplasticity. The investigation of deformation and fracture behaviour using the experimental methods of fracture mechanics has been the subject of intense research during the last decade.
