Just take the number minus This range of motion becomes smaller in the correct number. It took me a few times to get the feel for the various positions, but easier than cutting the lock or chain.

I've tried readjusting the amount of "lift" on the shackle, to no avail. If you used your formula, and compared your results with a well known matrix for master, one could perfect. I tried few methods, but this method worked perfectly!!

And may be a written example showing the formula that the calculator uses. You set the first 2 numbers of the combination and then slowly turn the dial clockwise, testing each number as you go, until you find the third number and unlock the lock. You can create a shim for yourself by cutting up a soda .
